

MOVING AVATAR IN VRChat VR EQUIPMENT

Edwin Garcia - 2022-05-27 - Comments (0) - Virtual Reality

Both Hand Controllers allows your AVATAR to move around, look in any direction, and allows you to bring up menus.

Using Remote Controllers for Directional Viewing:

Hand Controller:

1. Pressing **Y** on left hand controller and **B** on right hand controller will bring up menu. If menu is active, pressing **Y** or **B** again will make menu disappear.

2. Pressing **X** on left hand controller **MUTES**. Press **X** again to unmute.

3. Press **A** on right hand controller to Jump.

4. Press and Hold **X** or **B** will bring up brings up **GESTURES** menu. Pressing **X** or **B** again will make **GESTURES** menu.

- Use thumb stick to select **EXPRESSIONS** or **EMOJIS**. Once you selected **EXPRESSIONS** or **EMOJIS**, use your left thumb stick to choose which **EXPRESSION** to use or which **EMOJI** to use.

5. Pressing **Y** on left hand controller and **B** on right hand controller will bring up menu. Choose the option to sit or to stand.
